SKILLS

- Project Management, Teamwork, Effective Communication, Teaching, Leadership
- Languages known- English (Fluent), Hindi (Fluent), Bengali (Native)
- Proficient in MS Word, Excel, PowerPoint, Project, Suite; intermediate in SPSS, AMOS, JAMOVI and R.

RESEARCH INTERESTS

My research focuses on the psychological impacts of childhood maltreatment, particularly its influence on negative behavioural and health outcomes. I employ quantitative research methods with a focus on SPSS, AMOS and R for statistical analysis. Prospective areas of inquiry include alcohol and substance misuse and moral injury on trauma-informed, culturally sensitive applications through advanced quantitative methods including machine learning and meta science. My work seeks to inform both psychological theory and clinical practice, with long-term contributions to research, assessment, and intervention development for marginalized and high-risk populations.

EDUCATION

University of Sussex *September, 2026*
Masters in Research in Psychological Methods

Bengaluru City University, Indian Institute of Psychology and Research *August, 2024*
